

GUARANTEED FITMENT

When buying a set of aftermarket wheels, you may wonder whether they'll fit your vehicle – after all, there's such a wide range of wheels available on the market. But when you buy from our online store, you can rest assured you'll get wheels that fit your vehicle perfectly. We have a team of qualified experts who always double check each order to ensure that all fitment information provided on our website is accurate. The rims you get are guaranteed to not interfere with your factory brakes, suspension, steering system, and vehicle body components. Please be aware that our 100% fitment guarantee does not apply to modified vehicles.

When you install aggressively sized wheels, they will also fit your vehicle, but, unlike guaranteed wheel sizes, it will require some modifications. You may need to install a lift or lowering kit, trim your fenders, adjust the camber, etc. Fitment of aggressive wheel sizes cannot be guaranteed. The necessary modifications must be made in order for these to fit correctly, and all such modifications are the customer's responsibility. If the wheels you purchased from us don't fit properly, feel free to contact our experts who are always ready to provide assistance.

Check out an extensive selection of custom wheels we offer on our website.
